Comment: A second proposal by the same owners to convert a retail/leisure space following previous application to convert the bathroom showroom

If both go ahead that is 4 more residential units on a road with no street parking suitable for residents, thereby increasing the load on the immediately surrounding roads which are already overloaded.

This application makes no provision for any parking spaces at all, even though owners own the car park next to said building.

The area is already packed with cramped flats with no parking which puts more pressure on the surrounding roads, then there is the Police Station when that is built, also doesn't have sufficient parking
