

### LBRUT Sustainable Construction Checklist - June 2020

This document forms part of the Sustainable Construction Checklist SPD. This document **must** be filled out as part of the planning application for the following developments: all residential development providing **one or more new residential units (including conversions leading to one or more new units)**, and all other forms of development providing **100sqm or more of non-residential floor space**. Developments including new non-residential development of less than 100sqm floor space, extensions less than 100sqm, and other conversions are strongly encouraged to comply with this checklist. Where further information is requested, please either fill in the relevant section, or refer to the document where this information may be found in detail, e.g. Flood Risk Assessment or similar. **Further guidance** on completing the Checklist may be found in the Justification and Guidance section of this SPD.

Property Name (if relevant):  Application No. (if known):

Address (include. postcode)   
 Completed by:

For Non-Residential Size of development (m2)  For Residential Number of dwellings

#### 1 MINIMUM COMPLIANCE (RESIDENTIAL AND NON-RESIDENTIAL)

**Energy Assessment**  
 Has an energy assessment been submitted that demonstrates the expected energy and carbon dioxide emissions saving from energy efficiency and renewable energy measures, including the feasibility of CHP/CCHP and community heating systems? If yes, please select TRUE.

**Carbon Dioxide emissions reduction**

What is the on site carbon dioxide emissions reduction against a Building Regulations Part L (2013) baseline  
*Policy LP 22 B. and Draft London Plan Policy 9.2.5 require a 35% onsite reduction in CO<sub>2</sub> emissions beyond Building Regulations 2013.* % This is against 2021 Building Regulations

What is the percentage reduction from efficiency measures alone %

*Policy LP 22 C. and Draft London Plan Policy 9.2.6 require a 10% onsite reduction in CO<sub>2</sub> emissions beyond Building Regulations 2013 from efficiency measures for residential and 15% for non-residential.*

Percentage of **total** site CO<sub>2</sub> emissions saved through renewable energy installation? %

What is the total remaining carbon to be offset  Tonne

*Policy LP 22 B. and Draft London Plan Policy 9.2.4 require Major developments to achieve Zero Carbon after offsetting.*

Are remaining emissions going to be offset through offset fund payment in accordance with current guidelines issued for the cost per tonne of CO<sub>2</sub>?

What is the total predicted cost of offset?  £

*The London Plan sets this as £95/tonne per year over 30 years, this should be updated based on As Build calculations.*

#### 1A MINIMUM POLICY COMPLIANCE (NON-RESIDENTIAL AND DOMESTIC REFURBISHMENT)
