Comment: The Planning Group of the Teddington Society objects to this application for the following reasons:

The property lies within the Park Road Conservation Area. We are surprised, therefore, that the application was validated without a heritage statement.

The existing shopfront makes a significant contribution to the conservation area, containing features that can be seen in the best shopfronts on the High Street. This proposal appears to remove that character and, therefore, fails to preserve or enhance the conservation area.

The proposal does not comply with the spirit of the Council's Shopfronts Supplementary Planning Document, in that it has no regard for either the existing shopfront or the conservation area status.
