Comments

Type of comment: Make a general observation

Comment: This document is apparently intended to support the owner's successful application to put a roofed swimming pool in his garden. Whilst it rightly contains great detail about the construction process, it offers no further information about what the plan actually involves and as previous comments imply, there are serious mistakes with reference to location of access etc. It has the appearance of a document which has been hurriedly copied and pasted from a similar application elsewhere and I therefore hope it will be carefully scrutinised by the Council. I also note it is titled 'Basement Construction Method' which hints at the possibility of replacing the swimming pool with habitable accommodation, for which planning permission has not yet been given.
