

ZAUN'S GEMINI™

...transforms your fence into a feature.

Introduction

Arguably Zaun's most attractive fencing system, Gemini combines several beautiful curved top designs with a strong 'anti-vandal' construction. The mesh has the same twin horizontal wire construction as Zaun's Duo mesh (see pages 3/4) along with strong rectangular hollow posts with continuous clamp bars to protect the ends of the panels. Ball finials complement the design and come as standard on Gemini posts. Three designs are available (see opposite) in either concave, convex or a combination concave/convex to create an impressive wave pattern. Gemini is the fencing to choose to set your self apart from the rest.

Product Highlights

- Beautiful curved top design
- Strong twin wire construction
- Available in a range of concave and/or convex designs
- Matching Gates available
- Long Service Life with little or no maintenance
- Good through visibility
- Tamper resistant fixing system
- Easy to install

Specifications

Heights: 0.63, 0.83, 1.03, 1.23, 1.43, 1.63, 1.83, 2.03, 2.43 plus heights up to 6.10m in 200mm increments using multiple panels
 Post centres: 2.525m nominal.
