Type of comment: Make a general observation

Comment: The proposals for the revision of Chalkers Corner traffic junction do not fully cover the impact on the larger junction of the South Circular Road at Clifford Avenue and the A316. The new proposals would effectively feed additional traffic into this junction. Congestion at this junction, the whole of Clifford Avenue and the junction with the Upper Richmond Road West has already reached unacceptable levels accompanied by increased air and noise pollution since the closure of Hammersmith Bridge. This is particularly bad at rush hours, overlapping with school drop of and pick up times. Friday evenings are quite frequently gridlocked and local residential roads are being turned into rat runs. It seems appropriate to wait until the whole road system can be planned in relation to the future use of Hammersmith Bridge. Any major changes or significant new developments in the meantime could only make matters worse.
