Type of comment: Object to the proposal

Comment: I object to the proposal to construct another 106 residential units on South Worple Way on the basis that I do not feel assured that the road can support the additional traffic that would bring.

I want to highlight that the road is already heavily trafficed peak hours and especially when the train barrier is down. It is not only trafficed by vehicles but also cyclists and pedestrians. Dropp off and pick up time for school and nursery children is very busy and you have to go on and off the pavement when the traffic allows to simply move forward down the road. Even though not officially a single direction road it does act as one on several parts are single line and too narrow for two meeting car to pass at the same time.

I do not see how an already busy road can support another 106 residential units and still be a road considered safe. I'm a mother of two young children I don't feel confident that the plan to support another ~106 units (vehicles) have been thought through to keep the current habitants and children living on the road safe.
