**Comment:** Current infra-structure including particular the road space, access and system is far too narrow/small and inadequate to support more housing and the associated cars that will come with it. Whilst I appreciate the need for housing to be built it needs to be done in a sustainable and adequately supported manner in terms of required infra-structure. In this case the narrowness of the access roads and the heavy traffic already on surrounding roads will make this unsustainable. This simply leads to a less pleasant environment for everyone and is not a solution.
