Comments

Type of comment: Object to the proposal

Comment: I object on grounds of:
Density and traffic will exceed what this area can handle

Building heights and heritage- plans are in excess of what is appropriate to are in grounds discussed in other reports.

In relation to global warming- the current Urban Greening Factor is low. There is concerned about the limited opportunities for planting above the basement carpark and verges. the landscape should reduce the proportion of hard areas and to increase to soft to absorb heavy rainfall. Additionally I have a concern about potential flood risk from a freak (alias 'grey swan') event in the river as predicted by Horsburgh et al.
