Comment: I am all for more affordable housing, as this is a lovely area to live in, but, and it is an enormous but, there is not the infrastructure. The roads are beyond congested already; the only solution would be to build another bridge to elevate both the Upper and Lower Richmond Rd. In addition the railway crossing compounds the problem as it is a busy commuter route with the barriers down frequently for a good ten or fifteen minutes. If there was a spur off the district line underground, this would help reduce overground trains and therefore the barriers would be down less.
