Comments

Type of comment: Object to the proposal

Comment: I am a member of MESS and broadly share the objections that have been made under its auspices. My particular concern is the effect this high-density and architecturally overbearing development will have on air quality, road traffic congestion and general quality of life in this confined and architecturally sensitive area. In my view, a great opportunity to build a resilient and future-proof community is being lost through inappropriate density, lack of realistic transport planning and insufficient affordable housing. I do not oppose development on principle and would be pleased to see development that genuinely met local community and wider needs.
