### Comments

**Type of comment:** Object to the proposal

**Comment:** I object to the proposed development because the density of housing is too great for the site. This is exacerbated by the height of the proposed accommodation buildings. The site is not capable of sustaining the potential population because of a lack of local amenities and most importantly because of the increased congestion due to the traffic that will be created. The roads in the area already cannot cope with the volume of traffic especially at peak times and especially towards Chalkers Corner. It is already the case that bus routes struggle to get through thus detracting from the value of an important route to Richmond and currently also to Hammersmith.
