[REDACTED]

Dear Sir/madam,

I have lost track of the endless amendments but my husband and I looked at the current letter as part of the neighbour consultation.

However, the things we both noted is the height of the buildings in 2a and 3a. Buildings up to eight or nine storeys are completely inappropriate and out of character of the area. It is such a shame for a lovely traditional residential area. The brewery buildings at least used to have character.

The traffic generated from this enormous scheme is already a well known massive issue. Our area is already often grid locked and this absolutely will only make things so much worse. I note the loss of a reduction of 15 car parking spaces. This doesn't sound like a lot but parking is at a premium in local roads so very unhelpful.

Yours faithfully

J Melunsky
